

Reconciling profiler event time with measured wall time

Shrink-to-8 + sidecar, bucket 15500; training live ranks only; sidecar traces filtered

Largest pairwise overlap 7.8 ms

Attention n Routing

7.2 ms

Routing n Dispatch

6.0 ms

Attention n Dispatch

5.0 ms

Dispatch n MatMul

Raw event sum is for attribution; measured wall time is the critical-path performance metric.
